

**SEEKING SUPPORT & NOMINATION AS PPC FOR HOLBORN & St. PANCRAS**

*My name is Jacqueline 'JAE' Robinson and I believe in the LABOUR PARTY, in Fairness, Equality of Opportunity and living in a democracy where everyone feels valued. I'm direct, honest and not afraid to voice concerns on behalf of others.*

*I am seeking your support & nomination as a woman, a mum who raised children during the Thatcher era of greed and destruction. I bring real down-to-earth life experiences of the everyday disenfranchised majority not represented in Westminster. I'm direct and honest and not afraid to say the right thing for YOU and the constituency. **Who speaks for the ordinary person in***

Promote Holborn & St Pancras as *the* place to be; live, invest, work, spend and enjoy with a decent living wage for all.

Fight illegal DWP benefit sanctions and advocate for people in receipt of benefits not to be demonised. (Comparative Tax evasion sanctions instead?)

Continue my support of the NHS, endorse investment into frontline staff, training, and research. Especially decent wages for nurses. (Also for Firefighters)

Endorse value in education. I believe education & training should be appropriate, as "Gateways to employment". Young people should feel worthwhile. (Vote at 16)

***Westminster?  
Let me speak for you?***

I was born in the Whittington, on 27th February (giving me the same birthday party as our Labour Party), living in Kentish Town before moving around with dad's work as a lift engineer. We lived in so called "slum areas" and on Council Estates. Leaving school at 16, I graduated as a mature student as I raised my boys on an Estate in Manchester with all the social stigma and problems of today - Thatcher's Britain and life was hard. Unions and working class crushed, young people exploited and Local Authorities lost autonomy. I began working voluntary in my local community; drugs, single parents, domestic violence I've faced them all. Being positive and working with Labour councillors established community groups and looked forward to Labour government.

I'm proud to say I'm an "equalities nightmare" on behalf of those who need help, advice & support .

A "Deeds not Words" person, I'm often campaigning against the actions of a Government intent on causing suffering, poverty and deaths due to it's punitive austerity measures.
